

"I have been in the race horse business for forty-five years. We had a horse break his leg and were advised to put the horse down. With the use of the Electro-Equiscope not only did he recover but he went on to win 3 races. "Admirals War Chest", a five year old, was treated daily using the Electro-Equiscope and went on to win "The Jim McKay Maryland Million" in 2015 and he repeated in 2016. I highly recommend the Electro-Equiscope to treat the horse and the rider as well."

Dr Stephen Sinatra, M.D.

"Over the past 5 years I have personally witnessed the amazing results of the Electro-Equiscope. It began in 2012 with "I'll Have Another" who went on to win 2 jewels of the triple crown, the Kentucky Derby and the Preakness. His recovery was quicker than any horse I have ever seen. Had I not seen it with my own eyes I would have never believed it. I have one word for the Electro-Equiscope, Unbelievable!"

Larry "Thumper" Jones
World Renowned Horse "Whisperer" Therapist

"I heard about the Electro-Equiscope and its amazing results. I sent my son down to Thorp Institute to get trained in this new technology. We purchased an Electro-Equiscope for our horses in September of 2017. We have earned over one million dollars in the past 4 months. With just two of our horses, "ItsinthePost" and "River Boyne". Both horses are undefeated in 2018."

Jeff Mullins
Thoroughbred Horse trainer

"In 2018 I was first introduced to the Electro-Equiscope. I have used it on myself and my horses. Its a magical Machine!"

Ali Nilforushan
3 time Olympian in Grand Prix Show jumping

"We've had just a wonderful experience with John Thorp's micro-current calibrated devices. It took us to the Kentucky Derby, which we won with "I'll Have Another", then on to Baltimore where we won the Preakness Stakes. Tyler Cerin, who John so brilliantly trained, did a great job and it was a huge asset in our journey."

Doug O'Neill
Thoroughbred Horse trainer

"I have treated injuries that caused reproductive problems producing low semen counts, a fractured sesamoid, back and disc issues, stifle and hock problems, suspensories strained and torn, as well as severe cuts and bruises, all with amazing results. The majority of the Electro-Equiscope treatments and cases were overseen and documented by Dr. Charlie Buchanon, DVM and backed up by X-rays from Brazos Valley Equine Hospital."

Laurie Jones
Champion Barrel Racer
Certified Electro-Equiscope Trainer

TARGETED ACCELERATED HEALING WITH PROVEN RESULTS

ELECTRO-EQUISCOPE®

What makes the Electro-Equiscope so unique to other micro-current devices is that it is the only device available that has the ability to decipher abnormal tissue response and adjust the electrical output to produce a

corrective current that normalizes or relaxes damaged tissue. The treatment is completely non-invasive and painless.

When an animal becomes injured the body's normal electrical conductivity becomes altered. The Electro-Equiscope's micro-current therapy is administered through various types of small therapeutic probes and plates that offer a corrective signal that normalizes abnormalities with no discomfort or side effects.

The Difference Between the Electro-Equiscope and All Other Treatment Devices

Other therapeutic devices used in the equine field including electrical stimulation devices, ultrasound, magnetic fields, pulse magnetic and shock wave share one common characteristic, they are all one directional.

858-539-6111

This means that they all emit excessively large amounts of energy in a repetitive fashion, with pre-established patterns and without any feedback deviation or delay. They have an unpredictable effect on the health of biological structures. Their goal is to deplete the energy and hope for a positive response from the body as it rebuilds itself. The outcome is very unpredictable.

Targeted Accelerated Healing

The Electro-Equiscope is capable of receiving information from the tissue due to its sophisticated feedback modulator. The information is then processed through 4 computers and a precise output current is generated. The instrument then responds as the tissue responds until the proper bio conductance is restored to the cellular membrane enhancing ATP and restoring cellular homeostasis.

Trainers and owners alike depend on the most efficient and safest treatments available in order to maintain peak performance in their horses. **Electro-Equiscope's micro-current therapy offers unlimited creative therapeutic potential.**

Thorp Institute  Equine Therapy

Case Study 1

Philly caught her leg in a fence. Three weeks later, another Equiscope miracle.

Week 1

Week 3

Case Study 2

A torn shoulder muscle and wound that healed within three weeks of treatment.

Week 1

Week 2

Week 3

Case Study 3

These results were achieved in just three treatments.
